Website Name
TrustPay

Description of Topic
TrustPay will be a digital wallet website where users will be able to oversee how their financial transactions could be executed. This webpage will allow users to view various wallet balances, sample transaction data over time, and payment options in an organized arrangement. TrustPay lets its users understand how a digital wallet system operates such as observing spending and activity, which allows them to navigate through different sections. The purpose of this site is to replicate the experience of having a digital wallet without taking any real financial actions. TrustPay is an excellent tool for users who are unfamiliar with common digital wallet features as it serves as an informational platform.

List of Web Pages
1. Home
2. Dashboard
3. Wallet
4. Transactions
5. Support/Help

Description of the Data being Stored, Manipulated, and Viewed
The TrustPay webpage will store multiple elements in the profile section of the Home page, wallet data in the Wallet page, and transaction data in the Transactions page. First, a sample profile will be set with a username and display name. Next, a sample of available funds along with a stored balance value will be located in the digital wallet. Lastly, a list of transaction names detailed with the date, time, amount, and transaction type will be displayed alongside one another.

The TrustPay website will manipulate data in some ways for visual purposes of the website. For instance, users will have the ability to filter transaction lists by date, time, amount, and transaction type. With this, it maintains the webpage's main purpose of presenting financial information to learn in a clear format rather than performing any real financial actions.

The TrustPay website will allow viewing data for users to browse through the sample wallet balance, previous transitions, and navigate through different sections of the

webpage depending on what they want to explore. The data will be organized in several ways such as tables, summaries, and organized paragraphs for easy readability.
